

I'm am writing in concern to the new broadcast service known as Low Power FM(LPFM). I understand that there is a proposal to expand this service, in such a way that the new LPFM stations would take priority over the current FM translator service. I am a supporter of K-LOVE radio, which is broadcasted on FM station 105.3 in my area. If this new proposal is passed, I could potentially lose the ability to listen to K-LOVE. K-LOVE is a radio program that broadcasts family-friendly programming, which is very important to me and my entire family. It is so hard to find a radio station these days that broadcasts the family values I hold dear, especially in my area. Most of the stations around degrade family values and broadcast material not suited for young people, which makes it hard for young people to find a "clean" radio station. If K-LOVE is taken off the air due to this new proposal, I believe the effect on my local community will be traumatic. Families need to have a radio station that supports and encourages them. Children need to have a radio station they can listen to without a fear of what will be heard. There are enough attacks on families today, and we need all the help we can get. Due to our hectic schedules and long commutes to and from work, radio plays an large role in our community. A radio station that encourages me, helps me make it through the day and helps me unwind after a long day. I do not want to be stuck listening to a station that downgrades families and does not encourage good values. K-LOVE is very important to me and to others in my community. Parents have the freedom from worry about what their children will hear on the radio. Please take all of this into consideration when you are deciding on the new proposal. Please do not take away something that is very important to me and my family. Keep the current FM translator service going. Thank you for your time.
